

Customer Segmentation

Analytics Report · May 2026

This report presents a comprehensive RFM-based customer segmentation analysis covering 1,890 customers across six behavioural segments. Key metrics include purchase frequency, monetary value, recency, loyalty scores, and category preferences. Use these insights to craft targeted marketing campaigns, retention programmes, and personalised offers for each segment.

1,890	\$7.4M	47%	280
Total Customers	Total Revenue	Avg Loyalty Score	At-Risk Count

Segment Overview

Figure 1 · Customer distribution across six RFM segments

Segment Profiles

Segment	Customers	Avg Spend	Loyalty	Action
Champions	320	\$4,800	94%	Reward & upsell — VIP programme
Loyal Customers	540	\$2,900	81%	Loyalty perks & referral incentives
At-Risk	280	\$1,600	42%	Win-back campaign — limited offers
New Customers	410	\$680	21%	Onboarding journey & first purchase offer
Hibernating	190	\$900	33%	Re-engagement email series
Lost	150	\$340	8%	Final re-activation or sunset

Revenue Contribution

Strategic Recommendations

■ Champions (320)	Launch an exclusive VIP tier with early access to products and personalised rewards. Activate referral programmes — Champions are your best brand advocates.
■ Loyal Customers (540)	Introduce loyalty points with milestone rewards. Upsell into premium categories through personalised email campaigns anchored in their category preferences.
■ At-Risk (280)	Deploy a 3-touch win-back sequence: personalised discount, social proof, then a 'we miss you' offer. Prioritise customers with high historic spend.
■ New Customers (410)	Create a 30-day onboarding journey with product education, a first-purchase incentive, and a satisfaction survey at day 14 to identify issues early.
■ Hibernating (190)	Quarterly re-engagement campaign with a limited-time bundle offer aligned to their last purchase category. Remove non-responders after 2 cycles.
■ Lost (150)	One final reactivation email with a substantial discount. If no response within 30 days, sunset from active marketing lists to protect sender reputation.
